

Web Developer for Social Causes

We're looking for someone passionate about making the world a better place. Do you want to work for social justice? Join us.

Upleaf is a small but intense team of socially conscious professionals committed to helping nonprofit organizations increase their impact. We help our clients effectively address pressing social issues like education, health, poverty, civil rights, and even immigration—through strategic web design and creative technology solutions. Our clients include ACLU and United Way affiliates. See some of our clients and website work at <http://upleaf.com/clients/>
